#1. It cannot be determined from the	ne documentation if the tests were performed in a scientificall	y acceptable
manner.		
#2. The results are not adequately	documented in the notes. The notes are not dated, are in penc	ll and not ink and
use abbreviations that are difficult	to interpret (such as "M-dk dist, It dist, It indist" and "cut-ssp	" to describe
some of the characteristics of the h	air).
